

YOUR DENTIST CALLED!

IT'S TIME FOR YOUR APPOINTMENT

***Just like you go to the dentist
every 6 months...***

Your Furnace and Air conditioner should see a Precision Tune up Technician every 6 months to get a precision tune up. Regular check-ups will keep them healthy, and working in the most energy efficient way possible.

Many residents do not realize their home heating and air conditioning system operates approximately 3300 hours per year. To put this "run time" in perspective, a car driven for the same 3300 hours at 65 miles per hour would travel 214,500 miles. No one would consider such a journey without arranging for oil changes, lubrication, and routine tune-ups along the way.

Your home heating and air conditioning system serves you many more hours than your car, and, like your car, needs routine tune-ups to operate in a efficient, safe, and reliable manner

Our precision tune-up takes about 1 hour to complete and will restore your system to close to factory fresh standards. This unique precision tune-up is available to you for only the next

60 days at a special discounted price of \$119.

Since your system will likely be running another 3300 hours this year call us to schedule a convenient time to have your system brought up to maximum operating standards

**Call us today 612-869-3213 and make an appointment to
meet with our Precision Tune-up Specialist**

This is a limited time offer.
